CORROSIONX® AVIATION

CorrosionX Aviation takes corrosion control to a whole new level. Featuring the latest advances in Polar Bonding and Fluid Thin Film Coating (FTFC) technology, CorrosionX Aviation is specially formulated to displace moisture, stop corrosion instantly and provide long-lasting protection. Made in the USA, CorrosionX Aviation is qualified under MIL-PRF-81309G Type II (this is the current Mil Spec updating MIL-C-81309F) for corrosion prevention and control on airframes, and now, general purpose use as well. Used extensively in the Aviation Industry in Australia, now diversifying into all other areas in need of long term corrosion control.

CORROSIONX IS NOT HARMFUL TO THE ENVIRONMENT

The volatile organic content (usually abbreviated as VOC or VOCs) of CorrosionX is only 8.6%. That's about 1/10th what is in our competitors products (for example, WD-40 is 76% solvent). That means CorrosionX is many times more gentle on you, your equipment and the environment. In addition, CorrosionX is non-toxic, non-carcinogenic, and it's non-flammable when not in aerosol form (our environmentally-friendly propellant is flammable however).
